A Guide to Understanding Autism, the Assessment Process, and Ethically Sound, Clinically
12:00 PM - 02:00 PM EST

This webinar has been approved by the University of Detroit Mercy, an institution regionally accredited by the Higher Learning Commission, which is our partner in the offerings of Continuing Education activities.

This webinar provides an introductory overview of autism and two essential diagnostic tools used in assessment: the Autism Diagnostic Observation Schedule, Second Edition (ADOS-2), and the Autism Diagnostic Interview–Revised (ADI-R). The training covers the components of autism diagnosis and then moves into developing the skills needed to deliver clinically sensitive and ethically appropriate diagnostic feedback to parents and caregivers. Participants will learn key elements of the parental experience when receiving an autism diagnosis, including the essential components of an ethically sound and effective feedback session. Participants will learn how to identify research-based supports for families coping with a new diagnosis.

Non-members pay $60 per person and Members pay $40 per person. Membership costs only $75 yearly.
